

To Whom It May Concern:

Summit Integrated Systems has designed, installed, and maintained at least three complete sound systems on the campus of Flatirons Community Church, including the main 1,200-seat Auditorium's Renkus Heinz LCR line array system complete with Midas Heritage 2000 mixing console . Their high quality design and installation work shows excellent preparation and great attention to detail, while honoring specific requests for required performance and price points.

In all, the crew at Summit could not be more professional, accommodating, or enjoyable to work with. Their customer service is outstanding and they stand behind the systems they spec and install.

Sincerely,

Chris Coleman
Technical Ministries Director
Flatirons Community Church
