TO: Chris Rayburn  
Summit Integrated Systems  
RE: Letter of Recommendation

To Whom It May Concern:

This is my letter of recommendation for the firm Summit Integrated Systems. I have known the principle of the company, Mr. Rayburn for some years now. I have toured systems they have contracted and installed and have found the work first rate and the systems highly technical in nature. At least one of their systems has been featured in a sound industry trade magazine. The firm also benefits from the consultation of Mr. Ray Rayburn, Chris' father, one of my personal mentors and one of the most knowledgeable people in the audio industry.

Though Summit Integrated Systems is a relatively small firm, they are very competent. This is evident in the fact that Signal Perfection Limited (SPL), one of the largest and most highly respected low-voltage system integrators in the country, has sub-contracted Summit for multiple projects in the Rocky Mountain region. Such repeated trust must convey Summit's quality of work, project commitment, business ethics and technical capabilities far better than any letter I could write.

With the exception of extremely large projects, where their size limits them, I would recommend them for any A/V system project in the Rocky Mountain region.

Sincerely,

John A. Murray, Owner  
ProSonic Solutions
