Subject: Letter of Recommendation

Dear Mr. Rayburn,

Please accept this well-deserved letter of recommendation concerning your company, Summit Integrated Systems (SIS). Your installation at First Baptist Church of Bethany, Oklahoma has been of utmost quality and reliability – well beyond even our high expectations of your company. Interfacing with your team during the planning phase of our install was a joy even though our facility provided numerous challenges. Once on-site, your team overcame all of the challenges given to them, understood what needed to get accomplished, provided a realistic schedule, and met your deliverables. Again impressing our Building Committee, General Contractor and church body. Finally SIS did not disappear after the install but have continued to hold the quality and customer support bar high, always being responsive to our emails and telephone calls.

I am afforded a unique opportunity knowing First Baptist Church of Bethany is not a one-off install performed by SIS. Previously working with Curt Taipale's company, Taipale Media Systems, as a project manager, I have had the opportunity of being on-site at your other installs. Seeing your team in front of the client, and then after-hours at restaurants and hotels, I see a company that has employees with Christ-like attitudes. There is not a customer face that is put on by your employees, rather they truly enjoy their work, keep positive attitudes, and speak high of their clients both on and off the job. Again hats off to hiring top-notch installers and leads.

Again thank you SIS for providing the great service. It has been a true joy working with you. I hold no reservations recommending your company as you have greatly blessed the projects you have been a part of.

Regards,
